

Report
Of
INTRODUCTION TO CYBER SECURITY

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P
In partial fulfilment of the requirement of degree of
B.Tech CSE

By

Roll Number of Student: 2410030020

Name of Student: ANUSHKA SRIVASTAVA

Batch: 2026-27

2026-27

CANDIDATE'S DECLARATION

I, Anushka Srivastava do hereby declare that the internship report titled “Topic” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature

Student Name: ANUSHKA SRIVASTAVA

Roll No.: 2410030020

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work. I express my gratitude to my parents for their blessings.

Roll No.: 2410030020

Chapter No.	Chapter Name	Page Nos.
	Cover Page	----
1.	Candidate's Declaration	
2.	Acknowledgment	
3.	Internship Completion Certificate	
4.	Project Description 4.1 Introduction 4.2 Organization Profile 4.3 Problem Statement 4.4 Project Objectives 4.5 Scope of the Project 4.6 Technologies and Tools Used 4.7 System Architecture 4.8 Methodology 4.9 Expected Outcomes 4.10 Certificates of completion and other communication mail proof must be attached	
5.	Bibliography/References	

Instruction for the report format

- Cover Page, Copy of the Certificate issued by industry/organisation will have no Page Number.
- Page no. of Sr. No. 1 to 6 along with a list of tables and list of figures will bear the Roman Numbering System (e.g. i, ii, iii).
- Bibliography/References should be in proper format.

Size of Paper:	A4
Printing:	Single Sided
Left Margin:	1.5 inch
Right Margin:	1 inch
Top Margin:	0.75 inch
Bottom Margin:	1 inch (with Page No. at the centre)
Page Numbering:	Centered at the bottom of the Page
Line Spacing:	1.5 for text and 1 for References
Paragraph:	Justified
Font Type:	Times New Roman
Font Size:	12 for text and for with in tables can vary from 8-12 (But should be same throughout the report)
Heading Font Size:	12 for Sub Headings and 14 for main Headings with Bold Text

Cover Page:

As Specified Above

Tables, Figures and Graphs:

With Numbers indicating the chapters (1.1, 1.2 or 2.1, 2.2 etc.) and contain titles (above for tables

4. PROJECT DESCRIPTION

4.1 Introduction

The internship/course titled “Introduction to Cyber Security” provided a foundational understanding of cybersecurity and the importance of protecting digital systems, networks, applications, and information. The learning activity focused on developing awareness of cyber risks and the role of secure practices in modern computing.

Cybersecurity is an essential part of the digital environment because individuals and organizations increasingly depend on connected devices, networks, and online services. A basic understanding of security principles helps learners recognize risks, follow safer practices, and understand the importance of protecting information and computing resources.

The supplied completion certificate confirms that Anushka Srivastava successfully completed the “Introduction to Cyber Security” course on November 23, 2025. The certificate is issued by Infosys and carries Infosys Springboard branding.

4.2 Organization Profile

Infosys is a global technology and consulting organization that provides technology services, digital solutions, and professional learning opportunities. In the supplied certificate, Infosys is identified as the issuing organization for the completed Introduction to Cyber Security course.

The certificate also displays Infosys Springboard branding, indicating the learning platform associated with the course. This report documents the cybersecurity learning activity and its relevance to the academic and professional development of a B.Tech CSE student.

4.3 Problem Statement

The rapid growth of digital services has increased exposure to cybersecurity threats. Students and new technology users may understand that cyber incidents occur but may not have a structured understanding of security risks and protective practices. The problem addressed through this learning activity is the need for foundational cybersecurity knowledge that can be applied to everyday digital systems and future software engineering work.

4.4 Project Objectives

1. To develop a foundational understanding of cybersecurity and information security.
2. To understand the importance of protecting digital information and computing resources.
3. To recognize common categories of cyber threats and security risks.
4. To understand basic preventive and protective security practices.
5. To develop responsible and security-aware digital behaviour.
6. To relate cybersecurity concepts to academic learning in Computer Science and Engineering.

4.5 Scope of the Project

The scope of this report is limited to the learning and understanding associated with the Introduction to Cyber Security course documented by the supplied completion certificate. It covers foundational cybersecurity awareness, threat recognition, security principles, safe computing practices, and the relevance of cybersecurity to software and information systems.

The report does not claim implementation of a production cybersecurity system or a specific penetration-testing project because such activities are not evidenced by the supplied certificate or the report-format document.

4.6 Technologies and Tools Used

Technology / Tool	Purpose / Use
Digital Learning Platform	Accessing the cybersecurity learning content and completing the course.
Computer / Internet Environment	Supporting digital learning and access to online course resources.
Cybersecurity Concepts	Understanding cyber risks, information protection, and safer digital practices.
QR-based Verification	The supplied certificate includes QR-based verification for the completion record.

4.7 System Architecture

The learning activity can be represented through a simple conceptual architecture. The learner accesses cybersecurity content through the digital learning environment, studies

security concepts, develops awareness of cyber risks, and applies safe practices to digital activities.

Figure 4.1: Conceptual architecture of the cybersecurity learning activity.

4.8 Methodology

1. Course orientation: Understand the purpose and relevance of cybersecurity.
2. Concept learning: Study foundational concepts related to digital security and cyber risks.
3. Threat awareness: Identify common ways in which systems and information may be exposed to security threats.
4. Security practices: Learn practical measures for safer use of computers, networks, accounts, and online resources.
5. Application and reflection: Relate learned concepts to academic computing activities and everyday digital usage.
6. Course completion: Successfully complete the learning activity, as evidenced by the issued certificate dated November 23, 2025.

4.9 Expected Outcomes

1. Improved awareness of cybersecurity risks and the importance of information protection.
2. Better understanding of basic security practices and responsible digital behaviour.
3. Ability to recognize common security risks while using digital systems and online services.
4. Improved appreciation of security as an important part of software and computing systems.
5. A stronger foundation for further study in cybersecurity, networking, secure software development, and information security.

4.10 Certificate of Completion and Communication Mail Proof

The completion certificate supplied with this report confirms that Anushka Srivastava successfully completed the course “Introduction to Cyber Security” on November 23, 2025. The certificate is issued by Infosys and includes Infosys Springboard branding. The certificate page is attached in this report as documentary proof of completion.

No separate communication-mail proof was supplied with the files provided for preparing this report; therefore, no unsupported email evidence has been added.
